Cut it

- For drilling and tapping
- Reduces tool wear
- Improves surface finish

All products in 400 ml aerosol can, 6 cans/carton.

ABOUT US

We are your global partner for specialised industrial lubricants and process fluid technologies. As a market leading industrial chemical company, we formulate and produce over 600 quality products. We work with customers to improve their process efficiency, productivity and commercial advantage. The company, from research and development, through production, logistics and service is totally customer focused.

With PETROFER's expertise, technology and know-how, we have developed where required by the market, specialty items that add to our existing portfolio. We pride ourselves on listening to our customers, developing a product to meet their needs and delivering technology to optimise their special processes. Our specialty range is constantly developed to meet the rapid changes seen in industry both at global and local level. Please call your local PETROFER organisation to discuss your technical requirements.
